

Version History

AutoFit Columns

1.2.1

- Fixed bug where frame width was calculated incorrectly if the frame had a non-zero stroke width but “None” colour was selected.

1.2.0

- Disabled optical margin for all lines that are the same length as the longest line.
- Added progress bars for better feedback during processing.
- Enabled support for rotated cells.

1.1.0

- Added selection options (apply to all tables in story, or all tables in document).

1.0.5

- Fixed issue where Id-Extras menu item was not working.

1.0.4

- Enabled compatibility with justified paragraphs in tables, and all other justification options.

1.0.2

- Disabled optical margin alignment when applied to the longest line.
