

Version History

Mastermatic 3

2.5.1

- Fixed bug that prevented importing settings from earlier version documents.
- Closed target document if error occurred when importing settings (it was left open previously).
- Improved error messages for clearer troubleshooting when importing settings.

2.5.0

- Changed Sticky Master checkbox to a dropdown for better clarity.
- Made the width of the two “ignore pages” dropdowns equal for a cleaner UI.

2.4.1

- Enabled loading of settings from documents saved with earlier versions of Mastermatic (2.3.3 and earlier).

2.4.0

- Added scrollbar to the main master-paragraph pair panel.

2.3.5

- Changed script name to “Mastermatic 3”.

2.3.3

- Fixed issue with sticky values for object styles; sticky values were not being applied correctly until the end of the document in some cases.

2.3.2

- Fixed server migration issue.

2.3.1

- Set script preferences units to Points.

2.3.0

- Implemented a feature to repeatedly apply masters until no changes are detected or a vicious circle situation arises.
- Resolved issue where applying a master with different margins caused text flow issues and out-of-sync masters.

2.2.5

- Implemented a “fake” layout adjust for InDesign CC2019.

2.2.0

- Enabled loading of settings from other documents.
- Addressed error occurring when a document has no stories.

2.1.0

- Fixed issue where “Ignore end-pages” options were not stored correctly.

2.0.3

- Removed script versioning, resolving incompatibility with endnotes.

2.0.2

- Disabled `scriptPrefs.redraw` during script execution to prevent potential crashes.
- Added validation to check that `page[i]` is valid before checking its master, eliminating crashes.

2.0.1

- Fixed bug: On the same page, Style A's stickiness could not be turned off by switching to Style B. Now, Style B can switch off the stickiness of Style A.

2.0.0

- Improved sticky pages functionality to allow for special master assignment on the first page of a section.
- Added option to ignore the last X pages.

1.6.0

- Fixed UI jump issue when adding rows with ID UI scaling.
- Renamed menu item to lowercase.

1.4.0

- Added About Button version 1.0.
- Introduced check for no open documents.

1.3.0

- Pages with only a continued footnote are no longer considered blank.

1.2.1

- Fixed bug where the "ignorePages" label was placed higher than the existing number of pages in the document.
- Updated "Buy Now" link to the Id-Extras page.

1.2.0

- Introduced sticky master feature.

1.0

- Initial release based on version 1.0 of Apply Masters to Pages.
