

# Release Notes

## QuickResize Pro

### 1.5.7

- Improved compatibility when saving QuickResize settings on exit in older InDesign versions.

### 1.5.6

- Added support for resizing all documents in an open InDesign book.
- Removed the warning shown when enabling “Redefine scaling as 100%”.

### 1.5.0

- Improved numeric fields in the dialog: Arrow keys increment/decrement values; Shift+Arrow makes larger adjustments;
- Added option to work on the active spread only.
- Added option to leave margins unchanged.
- Added option to leave text unscaled.
- Fixed an issue involving endnote text frames.

### 1.4.3

- Fixed an issue where “Redefine scaling as 100%” was being applied to text on a path, where it should not.

### 1.4.1

- Improved reliability when resizing documents that use liquid layout rules.
- Fixed problems that could occur when reducing page size in documents with large margins.
- Also now adjusts master-page margins correctly during resizing.

### 1.4.0

- Added “Redefine scaling as 100%” for all text frames.

### 1.3.1

- Improved compatibility with InDesign 2019 and later.

### 1.3.0

- QuickResize now also scales the document grid.
